

Beyond the Stage

Decima1948

Shaping spaces that move you.

Since 1948, Decima has been a trusted name in the fields of theatre, music, performing arts and technologies. With over seven decades of experience, Decima has combined tradition with innovation, delivering state-of-the-art technological solutions for every stage needs. From iconic opera houses to modern performance spaces, Decima 1948 is synonymous with quality and competence worldwide.

Areas of expertise

Upper and lower stage machinery

Grandstand seat transformation

Stage curtains, draperies and scenography sets

SIL 3 Motion Control

Orchestra shell

Decima 1948 is the ideal partner for architects, engineers, designers, stage and acoustic consultants and both public and private clients, operating also on a global scale.

Flexseat

The Flexseat system is an innovative solution for multifunctional spaces, featuring advanced technology and a modular design that adapts to various needs. It is ideal for multipurpose halls, enabling quick transformation between different configurations (auditoriums, exhibitions, events).

Characteristics **Movement** Manual or motorized

Capacity Modules from 2 to 4 seats for manual system, modules up to 16 seats for the motorized one, configurable on any floor, stage, or grandstand seat

Materials Tubular structure onto which a 30/10 pickled steel sheet is welded with optional coverings (PVC, wood, or carpet)

Load capacity 500 kg/sqm

Certification EC and UL certificates

Key Features **Comfort** Same stability as a fixed floor seating, without any movement or oscillation

Durability High rigidity steel components

Economic efficiency One space for various purposes

Space and time saving Storage of seats under the floor for a quick transformation from one configuration to another

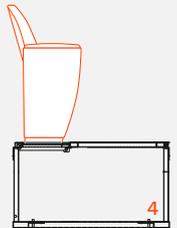

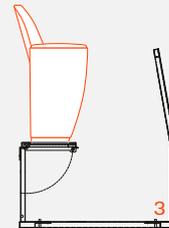

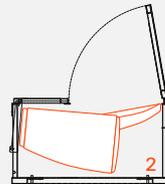

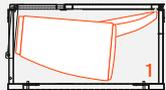

Opening sequence

1 Seat in the floor position

2 Movable floor elevation

3 Seat group lifting

4 Movable floor closure

Exhibition configuration (with platform) Seats under floor

Theatre configuration Seats on position

Lift ONE 500

Lift One is a smart chain hoist designed for positioning your ledwall, lighting hoist, and scenography with smooth, synchronized, and precise movements.

Characteristics

Working Load Limit 500 kg

Lifting Speed 0-24 m/min

Motor Power 2.2 kW

Double DC brake

Load Cell built in

Limit Switch 4 position

Absolute encoder on slow shaft

Incremental encoder on fast shaft

Safety Factor > 8:1

EN 17206 comply

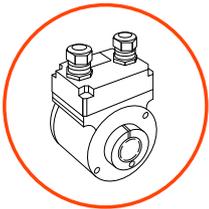

Key Features

Memory Recording the sequence of your configurations

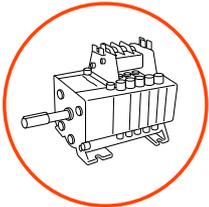

Monitoring Display of the load thanks to the loading cell

Tracking Reaching preset heights and monitoring the position and speed during movement through absolute encoder and incremental encoder

Control System Easy to use and guaranteed safety, thanks to the Curio control software and dedicated main frame and drive units

Positioning and speed encoder

Limit switch for position

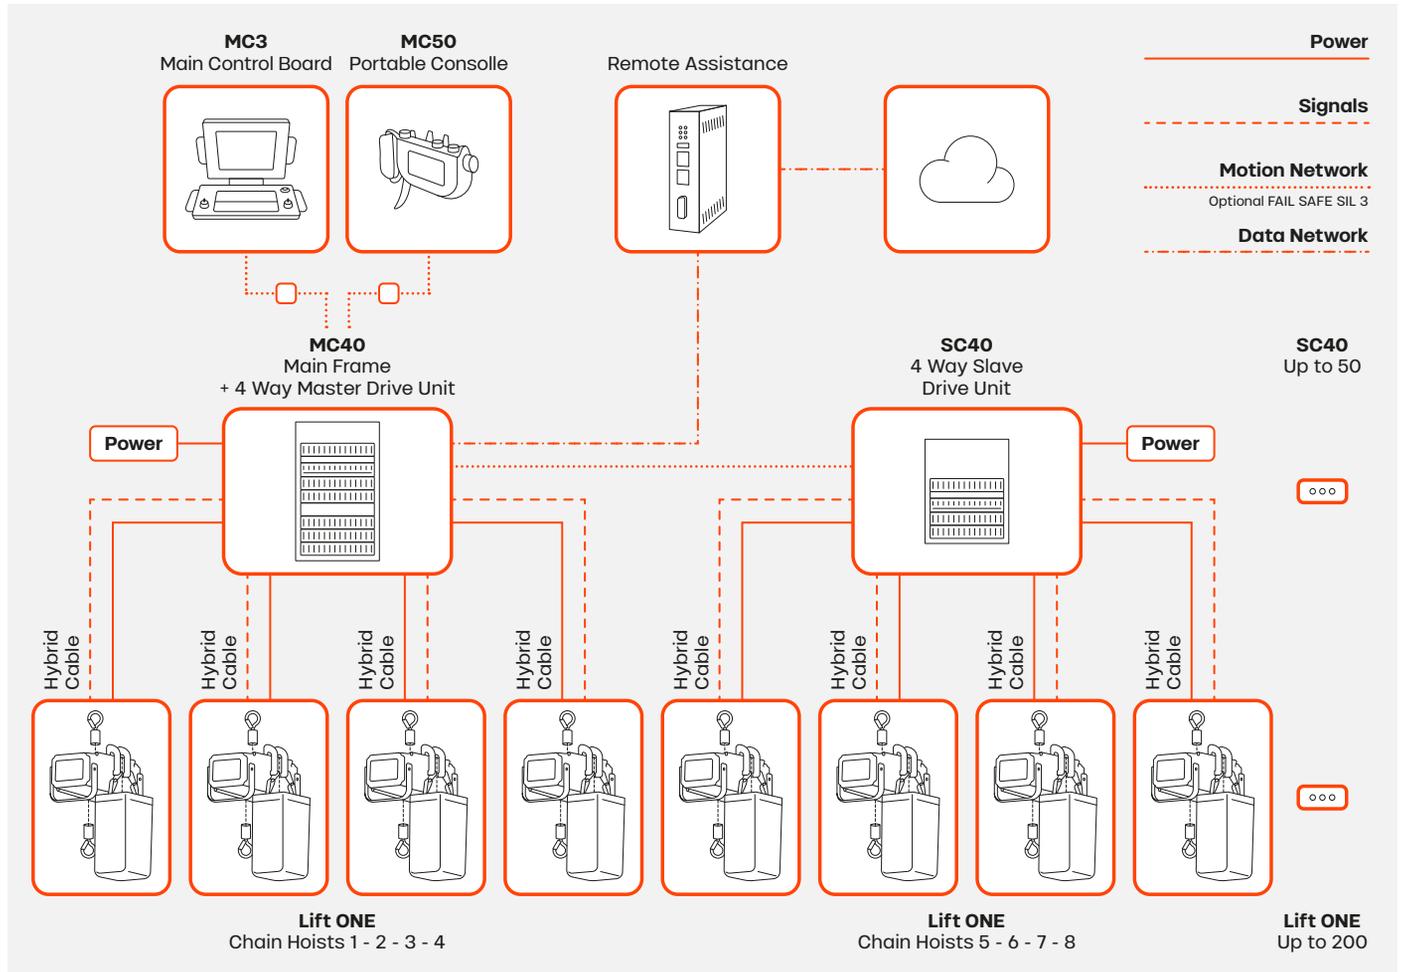

Loading cell

Curio 4.0

With over seventy years of experience in the entertainment industry, particularly in stage operations, Decima 1948 has developed the expertise and gathered valuable insights from industry professionals to introduce CURIO 4.0 Motion Control. This advanced, highly professional system is designed to meet the demands of complex stage handling.

CURIO 4.0 is a **SIL 3-certified system by Bureau Veritas**, capable of controlling hundreds of axes, and is already successfully used in numerous venues worldwide. Decima 1948 leveraged its extensive experience to create a reliable and safe chain hoist handling system, delivering performance comparable to that of prestigious opera houses.
